FOR IMMEDIATE RELEASE

Digi-Net Technologies Releases DigiChat v3.5 with full support for proxies and firewalls!

Important new feature dramatically increases functionality and accessibility for sites using DigiChat.

GAINESVILLE, FL, January 10, 2001 - Digi-Net Technologies, Inc., a leader in real-time messaging technology for eCRM and community building applications, today announced the release of DigiChat v3.5, the latest version of its java-based chat software. This updated version will offer HTTP tunneling abilities that enable chatters to use DigiChat from behind firewalls and proxy servers.

"Many companies today operate from behind firewalls and proxy servers to help ensure corporate and employee security. This can create a problem, as many chat products have difficulties working through such safeguards" says Robert Parker, President and CEO of Digi-Net Technologies, Inc. "DigiChat v3.5 effectively addresses this issue with its HTTP Tunneling Functionality, allowing people behind firewalls and proxy servers to use our product seamlessly. This increases a web site's potential customer base dramatically."

Janice Kaplan, DigiChat Product Manager, stated, "Universal support for proxies and firewalls was the most requested feature among DigiChat licensees. With the customer demand being so high, we made this functionality a top priority. We believe that this important addition to the DigiChat feature set will help to increase our rapidly growing share of the chat software market."

Building a community presence has become an essential part of growing online businesses. Feature-rich chat software, such as DigiChat, enables advanced product promotion, distance learning, corporate meetings, guest celebrities, or simple recreational chat for e-businesses, which in turn builds customer loyalty and repeat visitation from site visitors. DigiChat runs on all platforms, permits superior scalability, provides unsurpassed stability and flexibility, supports 18 foreign languages, and is fully customizable.

Site owners and webmasters are invited to download a FREE 15-day trial version of DigiChat 3.5 by going to <http://www.digichat.com/buyitnow.html>.
